ADVAIT DHARMADHIKARI

FORWARD DEPLOYED ENGINEER / APPLIED AI

Dublin, Ireland · advaitdharmadhikari27@gmail.com

github.com/advait27 · linkedin.com/in/advaitdharmadhikari · Portfolio

PROFILE

Customer-facing AI engineer translating ambiguous business challenges into production software. Builds agentic systems, RAG, evaluation infrastructure and secure enterprise integrations. Previously Founding AI Engineer & Product Lead at Frensei Innovation Labs and ML / BI engineer at IndiGo, with a foundation in business analytics and operations. Open to applied AI, founding engineering, forward deployed engineering and consulting opportunities.

ENGINEERING TOOLKIT

AI & reliability: LangGraph, MCP, RAG, multi-agent orchestration, eval harnesses, structured outputs, confidence scoring, OpenTelemetry.
Platform: Python, TypeScript, SQL, FastAPI, Docker, PostgreSQL / RLS, DuckDB, Qdrant, Neo4j, Redis, Supabase, GCP, Azure.
Enterprise delivery: Technical discovery, architecture, stakeholder alignment, OAuth 2.0, Gmail API, Microsoft Graph, PII masking, encryption, audit trails and tenant isolation.

PROFESSIONAL EXPERIENCE

Founding AI Engineer & Product Lead | Frensei Innovation Labs / ClawbackVault AI

November 2025 - September 2026 · Previous role · Dublin, Ireland

- Architected targeted email intelligence (header scan, PII masking, LLM classification), reducing inference costs by 80-90% per broker; built behavioural signal detection across 15+ categories with structured evidence and confidence scoring.
- Built Gmail and Microsoft Graph integrations using OAuth 2.0, incremental synchronization, tenant isolation and secure consent flows. Implemented encryption, prompt-injection protection, GDPR export and audit logging; helped the platform satisfy CASA Tier 2 and Google OAuth Restricted Scope requirements.
- Built production evaluation using structured-output validation, calibrated confidence thresholds and regression testing. Partnered with leadership and customers on technical discovery, onboarding, roadmap and pricing strategy.

Business Analyst & ML Engineer | IndiGo / InterGlobe Aviation

January 2024 - August 2025 · Gurugram, India

- Delivered aircraft weight prediction and operational cost models supporting operations across a 300+ aircraft fleet, contributing to approximately 20% cost savings.
- Led technical discovery, requirements definition and stakeholder alignment; built cloud analytics supporting operations, maintenance and executive decision-making.

Business Intelligence Engineer | IndiGo / Business Technology & Product

June 2023 - December 2023 · Gurugram, India

- Built production BI and insight frameworks on GCP and Azure. Requirements analysis, reporting logic and product parameters improved decision quality by approximately 40%.

ADVAIT DHARMADHIKARI

SELECTED SYSTEMS & OPEN RESEARCH

EADIP - Enterprise Autonomous Decision Intelligence Platform
A governed multi-agent platform for business investigations: plan, retrieve, query, verify and report. An independent Verification Agent re-derives numeric claims; side effects require human approval. Postgres RLS, vector search, graph-based metric lineage and CI reliability gates. Delivered across 12 phases with 274 unit and integration tests.
github.com/advait27/EADIP

Veritas - evidence-backed investigation over MCP
Self-hosted MCP server for hypothesis-driven analysis of CSV, Parquet and Excel data using DuckDB. Numeric claims trace to executed artifacts; opportunity and risk discovery uses false-discovery-rate control and a public planted-cause evaluation suite.
github.com/advait27/Veritas

What Agent Traces Cannot Tell You: Evidentiary Adequacy of Runtime Records for Agentic AI Oversight
First-author preprint and open benchmark, 2026. Evaluates 1,200 enterprise agent trajectories, six determination families and four record conditions.
DOI: 10.5281/zenodo.22814181

Forward Deployed Engineering: A Systems Engineering Perspective
First-author preprint, 2026. A multivocal review of 133 academic and practitioner sources, mapping enterprise AI deployment to ISO/IEC/IEEE 15288 lifecycle processes.
DOI: 10.5281/zenodo.22813634

Published Python packages: hallucimap, fraudguard, finfeatures, finance-automl, esgprofiler and mlopter.

TEACHING, CONSULTING & MENTORSHIP

Teaching Assistant - Digital Technologies in Business, University College Dublin · Jan-May 2026
Postgraduate tutorials on AI in business, digital transformation and data-driven decision-making for 150+ students, connecting academic frameworks with industry practice.

Business Analytics & Machine Learning Mentor, topmate.io · Jan 2025-May 2026
1:1 coaching in LLM application development, technical skill-building and career positioning.

Business Development Analyst / Team Lead, CHRIST Consulting · Jun 2021-Jun 2022
Led a 15-member analyst team; client recommendations contributed to 25% growth in new business and approximately 15% improvement in renewals and upsells.

EDUCATION & RECOGNITION

MSc, Business Analytics - UCD Michael Smurfit Graduate Business School · Sep 2025-Sep 2026
PG Professional Certification, AI & Machine Learning - IIT Kanpur · Oct 2023-Jul 2024
BBA, Business Analytics & Data Science - Christ University · Jun 2020-Jun 2023

Honours: Global Leadership Programme (Dean, UCD College of Business); UCD Advantage Award, 2026.
Additional learning: Introduction to Model Context Protocol; Data Strategy; Google Project Management; BCG Advanced Analytics & Data Science Virtual Experience.
Languages: English, Hindi, Marathi. **Writing & speaking:** Medium; The Business Technologist and 5 Minute Boosters podcasts.
