ADVAIT DHARMADHIKARI

FORWARD DEPLOYED AI ENGINEER | APPLIED AI & ENTERPRISE LLM SYSTEMS

Dublin, Ireland | +353 89 204 0580 | advaitdharmadhikari27@gmail.com

GitHub | LinkedIn | Portfolio | ORCID

PROFILE

Applied AI engineer with 3+ years across business intelligence, machine learning and enterprise AI delivery. Previously Founding AI Engineer & Product Lead at Frensei Innovation Labs, building compliance intelligence systems with privacy controls, enterprise integrations and evaluation workflows. Earlier experience at IndiGo supported operations across a 300+ aircraft fleet. Creator of EADIP and Veritas, with open-source work spanning governed agents, MCP and evidence-backed analysis. Combines technical discovery, software engineering and business problem-solving.

ENGINEERING TOOLKIT

AI & evaluation: RAG, LangGraph, MCP, multi-agent orchestration, structured outputs, evaluation harnesses, confidence scoring, Claude, OpenAI, open-weight models.
Software & data: Python, TypeScript, SQL, FastAPI, Docker, PostgreSQL / RLS, DuckDB, Qdrant, Neo4j, Redis, Supabase, pytest, mypy, ruff.
Platform & security: GCP, Azure, OpenTelemetry, OAuth 2.0, Gmail API, Microsoft Graph, PII masking, AES-256-GCM, tenant isolation, audit trails.
Customer delivery: Technical discovery, solution architecture, stakeholder alignment, roadmap planning, onboarding and product strategy.

PROFESSIONAL EXPERIENCE

Founding AI Engineer & Product Lead | Frensei Innovation Labs / ClawbackVault AI

October 2025 - October 2026 | Dublin, Ireland | Previous role

- Reduced LLM token spend by 80-90% per broker by replacing full-inbox scanning with a three-stage pipeline: header scan, PII-masked body fetch and LLM signal classification.
- Built evidence-backed churn detection across 15+ behavioural categories using Claude, confidence scoring and audit trails. Internal evaluation on labelled broker threads showed approximately 60% fewer hallucinated or inconsistent outputs after validation and calibrated thresholds.
- Shipped Gmail API and Microsoft Graph integrations over OAuth 2.0, with secure consent flows and row-level tenant isolation. Implemented encryption, PII masking, prompt-injection protection and GDPR export; helped satisfy CASA Tier 2 and Google OAuth Restricted Scope requirements.
- Automated compliance research with planning, execution, verification and feedback workflows using LangGraph and tool calling; embedded regression testing into delivery.
- Built and led a cross-functional AI, security and analytics team. Partnered with the Founder/CEO on technical discovery, customer onboarding, the engineering roadmap and pricing architecture.

Business Analyst & ML Engineer | IndiGo / InterGlobe Aviation

June 2023 - August 2025 | Gurugram, India | BI and ML engineering progression

- Developed aircraft zero-fuel-weight prediction and operational cost models supporting a 300+ aircraft fleet, contributing to reported operational cost savings of approximately 20%.
- Delivered ML and BI frameworks on GCP and Azure, translating stakeholder requirements into deployed analytics. Redesigned reporting logic and model parameters to support operations, maintenance and executive decisions.

ADVAIT DHARMADHIKARI | SELECTED ENGINEERING WORK

AI PROJECTS & OPEN SOURCE

EADIP - Enterprise Autonomous Decision Intelligence Platform | Repository

- Built a governed multi-agent investigation workflow: plan, retrieve, query, verify and report. An independent Verification Agent re-derives numeric claims; human approval gates side-effecting actions. Includes Postgres RLS, GraphRAG metric lineage and CI gates across 274 unit and integration tests.

Veritas - evidence-backed investigation over MCP | Repository

- Built a self-hosted MCP server for hypothesis-driven investigation of CSV, Parquet and Excel data using DuckDB. Numeric claims trace to executed artifacts; opportunity and risk discovery uses false-discovery-rate control and a public evaluation suite of planted-cause datasets.

Published Python packages: HalluciMap (LLM output risk scoring), FraudGuard (fraud / anomaly classification), FinFeatures (financial feature engineering), Finance AutoML (model selection), ESGProfiler (ESG scoring) and MLOpter (ML optimization).

RESEARCH PREPRINTS

What Agent Traces Cannot Tell You: Evidentiary Adequacy of Runtime Records for Agentic AI Oversight | First author, 2026
Open benchmark evaluating 1,200 agent trajectories, six determination families and four record conditions. Compares whether runtime records can substantiate oversight findings; reported outcomes apply to the benchmark conditions.
DOI: 10.5281/zenodo.22814181 | Benchmark artifact

Forward Deployed Engineering: A Systems Engineering Perspective | First author, 2026
Multivocal literature review mapping enterprise AI deployment to ISO/IEC/IEEE 15288 lifecycle processes and proposing a cross-organizational deployment lifecycle.
DOI: 10.5281/zenodo.22813634

ADDITIONAL EXPERIENCE

Business Development Analyst / Team Lead | CHRIST Consulting

June 2021 - June 2022 | India

- Led a 15-member analyst team on market-entry and growth-strategy engagements. Data-driven proposals and recommendations contributed to 25% growth in new-business acquisition and approximately 15% improvement in renewals and upsells.

Teaching Assistant, Digital Technologies in Business - UCD | January - May 2026
Postgraduate tutorials on AI in business, digital transformation and data-driven decision-making alongside full-time engineering.

Business Analytics & ML Mentor - topmate.io | 2025 - 2026
One-to-one coaching on LLM application development, technical skills and career positioning.

Earlier data science and analytics internships: IndiGo, LetsGrowMore, The Sparks Foundation and EntryLevel (2020-2023).

EDUCATION & RECOGNITION

MSc, Business Analytics - UCD Michael Smurfit Graduate Business School
September 2025 - August 2026
PG Professional Certification, AI & Machine Learning - IIT Kanpur
October 2023 - September 2024
BBA, Business Analytics & Data Science - Christ University, Bangalore
June 2020 - June 2023

Honours: Global Leadership Programme (Dean, UCD College of Business); UCD Advantage Award, 2026.
